

Salary:	Main Scale
Hours:	Full-time
Starting:	1 st September 2026
Contract:	Fixed term for 1 year in the first instance
Responsible to:	Head of Science Faculty
More Information:	This post is suitable for an Early Careers Teacher

We are seeking to appoint a highly motivated, enthusiastic and ambitious Teacher of Science to join the Applemore family.

This role offers an excellent opportunity for teachers who are imaginative, creative and inspiring to work in a supportive team and fast paced school where students are at the heart of everything we do.

We are seeking a dynamic classroom practitioner who is flexible, dedicated and passionate about delivering quality learning experiences and ensuring the values of believe, respect and determination are embedded in their practice.

Role Purpose

- To deliver high quality Science education, fostering a love for Science and encouraging academic progress among all our students in a safe learning environment.
- To support the Science Department in the development of departmental planning, review and participation in extra-curricular activities.
- To create a welcoming and inclusive classroom environment that supports all learners
- To assess, monitor and track student progress, using this to inform teaching and interventions

The School

Applemore is a place where we want our students to believe in themselves, respect themselves and show a determination to follow their ambitions to be successful in the next stages of their lives. As a staff body we are ambitious for all of our students, and we do this by offering opportunities for our students to empower them and create lasting positive memories.

We are a small school and place a high value on the connections we make through the families we work with and set high expectations for the students we see so every student can thrive. Our students leave Applemore equipped with the tools they need to lead happy and successful future lives.

The Science Department

We are a small and supportive team with a great breadth of knowledge. Teachers will teach all three Sciences in KS3 and KS4 following a custom scheme of work for KS3 and AQA trilogy and separate science for KS4.

Students benefit from experiencing a range of practical work with an emphasis on skills and investigation to aid learning. We encourage students to take part in the trips offered to expand their Science capital. We offer an eco-schools club and a visit to their annual conference.

We are privileged to live in close proximity to a National Park to include context in our studies and have links with the local refinery and maritime industries to show students the opportunities available in their area pursuing a Science related career.

We look forward to meeting any potential candidates whether you are an experienced teacher looking for a new challenge, an ECT looking for somewhere to learn how to become a great teacher or even a non-specialist teacher with an enthusiasm for Science looking to re-specialise.

Key Responsibilities

Teaching & Learning

- Plan, prepare and deliver engaging Science lessons to a consistently good standard.
- Assess, record and report on students' progress and attainment.
